DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or fairly suggest the combination of a working operation means being operated in a state where the rotating operation means is not operated and that if the output of the working device based on the operation of the working means is greater or equal to a set value, the control means is adapted to release the operation of the parking brake. The prior art of record also fails to show or fairly suggest the control means being adapted to release the operation of the parking brake and to control the rotating electric motor to hold the upper rotating body in a stopped state if operation of at least one of the working and traveling operation means is carried out in a state that the rotating operation means is not operated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see the Notice of References Cited for further information.
